Proposal Project — SkillSprint: Microlearning & Side Hustle Tracker

Project Name:

SkillSprint: Microlearning & Side Hustle Tracker

   (other name ideas — SkillSprint / 30DaySkill / MicroHustle)

Project Overview:

An app that helps beginners quickly learn a skill and launch their first mini-income stream in just 30 days — simple, guided, and action-focused

Problem it solves:

- People want to learn new skills fast and make money but feel overwhelmed.
- They waste time jumping between YouTube, blogs, and random tutorials.

Target users: Open to everyone interested in learning new skills. Esp., teens, college students, & early career starters.

Key MVP features (Functions):

- 30-Days Challenge Creator (auto-suggests daily tasks)
- Daily Action Checklist (check off tasks)
- Progress Tracker (visual streaks or progress bar)
- Resources Linker (connect to simple articles/videos if needed)
- Public Work Templates (portfolio, gig post, etc.) — *Optional*

MVP First Launch Content (Ready Inside App):

- 3 Preloaded Starter Challenges (Canva Beginner, Freelance Starter, AI Mini Skills)
- Basic Account System (login/register)
- Streak + Progress Tracker ready
- Public Work Templates ready to use

Success Criteria:

- A working prototype users can log in, pick a skill, complete daily tasks, and track progress.
- Super simple UI, minimal bugs.
- Test with 5–10 real users and get feedback.
